DOMAINE DES BRISSONS DE LAAGE – THE BERTRAND FAMILY ESTATE -

In the heart of one of the two premier growing regions of Cognac, "Petite Fine Champagne", the Bertrand family has passed down from generation to generation, since 1731, the art of cultivating the vines.

The 82 hectares of vines extend over a landscape with abundant limestone to regulate water and protect the vines from drought. The high limestone content of the soil ensures a limited production from the vines, but of superior quality.

Single estate production, from grapes harvested exclusively in our vineyards, carries our personal guarantee of origin and authenticity.
